

Case 1: Power-switched PNP bipolar design.

Case 2: Power-switched FET P-channel design.

Case 3: Ground-switched NPN bipolar design.

Case 4: Ground-switched FET N-channel design.

The associated circuitry for these drivers was described in the June '01 issue of Kitplanes Magazine.

I1, I2, I3, and I4 are the lamp loads, not to exceed 3 amps maximum current.
